Two giant Caterpillar 775G delivered to Cyfield by CTC Automotive Ltd

In a ceremony held at the Shacolas Group headquarters, two giant dump trucks Caterpillar 775G were delivered from CTC Automotive Ltd to Cyfield construction company, for use at the company's quarry in Pareklisia.

These are the largest heavy-duty Caterpillar equipment ever imported in Cyprus, having a transport capacity of over 70 tons, valued at €1,600,000.

The United States Ambassador Ms Julie Fisher honoured us with her presence at the ceremony, while Cyfield was represented by one of its directors, Despina Chrysochou.

CTC Group Honorary Life President Nicos Shacolas, welcomed distinguished guests and extensively referred to the wider historical ties with the United States, as also expressed by the close relationship between CTC and Caterpillar.

CTC has represented Caterpillar in Cyprus for over 90 years, a highly successful, fruitful, long term cooperation. And to that effect, Nicos Shacolas assured the US Ambassador that the CTC Group of Companies will continue to further develop commercial relations both with Caterpillar as well as other American firms.

CTC Automotive Ltd Chief Executive Officer George Kozakos noted the fact that Cyfield is currently at the top of CTC's most important customers and Caterpillar is established as a major partner to the company.

In her address, US Ambassador Julie Fisher underlined the close ties and excellent relations with Cyprus at all levels and how this long standing relationship is also expressed by CTC's business ties with Caterpillar.

Caterpillar is the global leader in the manufacture of high-quality heavy machinery, power generation systems and marine engines with a wide range of quality products across the board.

The two dump trucks 775 G delivered to Cyfield are equipped with modern technology systems, providing comfort, functionality and safety to the operator and will significantly contribute to the reduction of production costs.

Caterpillar's highly trained technical team offers the required after-sales support through its large inventory of spare parts.

A demonstration of the equipment followed.
